**Instructions for Use  
FloZein Vegan Glazes**

**PREPARING ZEIN SOLUTION**

FloZein Vegan Glazes are ready-to-use formulations.

**APPLYING ZEIN SOLUTION**

Warm the Zein solution to 40° - 50° C and apply the Zein onto the material to be coated. If possible, apply a warm air stream blowing over the just coated materials to help it dry.

Apply by panning, brush painting, spraying or fluid bed drying.

**APPLYING A FLAVOR**

To adhere a flavor, follow the steps above, except apply the inclusive while the coating is still tacky. Allow the coating and flavor to dry.

**Warning: This solution contains ethanol.**

**Ethanol is highly flammable. Do not use a direct flame or heat the solution with an electric heater or microwave oven. Instead, place the FloZein solution into a heated water bath.**
